

**Developments in Literacy**

Educating Children • Empowering Communities

## OUR VISION

We believe that no child in Pakistan, no matter how poor, should be denied access to a life-changing education. All children should have an equal opportunity to reach their full potential and contribute toward the socioeconomic betterment of their communities.

## OUR ADVANTAGE

Specialising in building the capacity of in-service educators who work in underserved areas of Pakistan, DIL's technical support programme has a competitive edge for the following reasons:

### Partners in Private & Public Sector

DIL has a proven track record of successful capacity-building interventions in more than 40 partner organisations.

### Tried & Tested Delivery Mechanisms

Successful solutions tested in DIL's own lab schools are deployed for greater impact.

### Nominated as Best Partner by the FDE

The Federal Directorate of Education (FDE), where DIL has adopted 55 schools, has declared DIL as their best supporting partner for school adoption.

**Unlocking True Potential, One Lesson at a Time!**

# DIL'S IMPACTFUL CAPACITY BUILDING MODEL

With a vision of making quality education accessible to underserved children across Pakistan, DIL is proactively adopting public and low-income private schools and providing technical support to improve teaching and learning in their classrooms. As a prerequisite, DIL conducts a comprehensive gathering exercise (details in graphic below) to understand the context, and analyse the actual needs, of the target audience.

DIL's high-impact programmes lead to the following outcomes for teachers and students:

- Improved content knowledge & pedagogical skills of teachers through continued professional development
- Better school management through ongoing monitoring and support
- Engaged and confident students through learner centered teaching practices

# DIL'S QUALITY INTERVENTIONS

Our capacity-building programme is an integrated combination of ongoing programme support and high-quality curricular inputs designed to leverage gains in learning outcomes, cultivate student creativity, and foster critical thinking skills. These include:

## ● Program Oversight & Support

A dedicated project team is deployed to provide ongoing monitoring and follow-up support to the adopted schools.

## ● Early Childhood Education Program

DIL's flagship ECE programme not only creates engaging ECE classrooms in the adopted schools, but also trains teachers in student-centred strategies rooted in international best practices.

## ● Libraries & Reading Program

Joyful library spaces with dedicated library teachers are set up both to encourage a love of reading and enhance student reading comprehension skills. E-books on tablets are added to improve the repository of reading resources.

## ● Technology Enabled Learning

Our signature EdTech programme, Technology Enabled Academic Learning (TEAL), supports core subject instruction for middle grade students through video lessons, equips teachers with digitised lesson plans, and standardises the quality of teaching across schools.

## ● Training & Curriculum Support

Teams of experts craft curricular materials and deliver quality training to teachers and principals. Subject specialists fill content knowledge gaps, the General Pedagogy team teaches pedagogical skills, and principals hone their abilities in academic monitoring and support.
